

Slim™

Pre-programmed
Command

LMC Systems

USB Professional Grade Audio

Slim™ is the new Best in Class USB microphone/speaker station that offers professional grade audio with plug and play capabilities across all P.C. platforms, for virtually any PC based audio use case. Slim™ requires no training. Slim™ is uniquely designed for PTT to interface with any voice software using a keyboard command. Any keyboard/game port command for PTT can be pre-programmed at the factory. Slim™ has a heavy duty enclosure for reliability in any environment. Built to order.

Features:

- Pre-programmed at the factory
- Noise canceling microphone
- USB 2.0 uses HID drivers native to Windows™
- Runs on USB power
No external power required
- Compatible with XP, Vista, 7, 8, 10
- Built-in speaker and local volume control
- Company branding available
- Far superior to consumer grade devices this is built to take on a daily production workload
