FTT-100
Pre-programmed

LMC Systems

USB Pre-programmed Foot Pedal

This foot pedal is based on existing solid technology. LMC can easily program a simple keystroke of your choice to engage at a press of the foot pedal.

The FTT-100 comes from the factory with customer specific programming. No software to download.

Far superior to consumer grade foot devices this is built to take on a daily production work load. Save employee time and labor with repetitive keystrokes.

Examples of use:

- Tab through forms
- Industrial control applications
- Hotkeys to match software applications
- Push to talk (PTT) for VoIP software

Features:

- The user has pre-programmed keystroke choice
- Rugged device built for heavy use applications
- No external software required
- Multiple foot pedals can be used at a single workstation
